DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dietle et al '541 in view of applicant's admission of prior art at page 2, lines 5-7. Dietle et al discloses all that is claimed except for the O-rings. Dietle et al does disclose the use of rotary seals 23, 27. Applicant discloses that O-rings may be used as rotary seals, as stated on page 2, lines 5-7. It would have been obvious to one of ordinary skill in the art to provide O-rings taught by applicant's admission of prior art, since doing so provides a seal for a use with a rotary shaft.

Response to Arguments

3. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.
